

Climate Ed - Theory of Change

Vision

A society where young people understand how they can tackle climate change and are empowered to act.

Carbon emissions of young people, families, and communities is reduced

Climate anxiety is reduced among young people.

Mission

Provide high-quality carbon literacy education to children across the UK, and enable them, their families, and communities to reduce their carbon emissions.

Outcomes

Increase carbon literacy among children Inspire children and their families to take action to reduce their emissions.

Reduce climate anxiety among children Improve dialogue and collaboration between adults and children about climate change

Outputs

Volunteers deliver workshops on climate change.

Families engage in take-home/online challenges on carbon reduction.

Young people, schools, and families monitor CO2 savings.

Inputs

Relevant and fun content on climate science and carbon footprints.

 Volunteers with training and expertise in the subject matter. Training and support for volunteers in content and delivery methods.

Framework for measuring and recording CO2 savings.

Support from schools, councils, and other partner organisations
